

## Supply Chain Empowerment Programme

---

TEC's unique supply chain empowerment programme provides a combination of training and coaching to ensure that supplier organizations and their people become self-sufficient and capable of fully implementing and exploiting the AS9100:2016 series of standards, AS9145:2016 (APQP & PPAP) and other essential quality tools and techniques – for maximum benefit to their customer and themselves!

Customers may opt for the full programme or 'pick-and-mix' training course topics to suit their supply chain needs

The programme also offers an ideal opportunity for customers to work closely with, and further develop, their supply chains – providing a mutually beneficial and rewarding outcome for all parties.

In conjunction with TEC, the customer may either choose to host the events their own site(s) or at TEC's prestigious corporate training venue. All levels and specialisms are catered for, and the programme can be customized as required. Group empowerment training is always augmented by on-site coaching and mentoring for the suppliers involved – to ensure that best practice becomes custom-and-practice.

TEC can take care of all the administration on your behalf of the customer if required to ensure a smooth, hassle-free process

Customers can pick and choose from any of the courses listed within the portfolio to form a bespoke supply chain programme.

Because TEC are an IAQG Training Provider, a CQI & IRCA Approved Training Partner, an SC21 Strategic Partner, a global ASEQ Training Provider and an NMCL C+C Provider our training courses are recognised and accepted internationally.
